

EUDR DUE DILIGENCE STATEMENT

No. 2590015487

As part of the timber commodity sector, APP Group is fully committed to ensuring that our supply chain aligns with the deforestation-free requirements of the European Union Deforestation Regulation (EUDR). This commitment is anchored in our [Sustainability Roadmap Vision](#) and [our Fibre Procurement & Processing Policy](#), first established in 2013.

All APP suppliers are certified under Indonesia's mandatory *Sistem Verifikasi Legalitas Kayu* (SVLK), and most also hold voluntary PEFC-IFCC certifications. Supplier information and certification status are available via APP's [Sustainability Dashboard](#).

APP has developed an internal product tracing system that enables full traceability, including geolocation data of plantation forests where the material originated.

In accordance with the EUDR, relevant commodities and products must originate from supply chains that are demonstrably deforestation-free, be produced in full compliance with the applicable laws and regulations of the country of origin and be accompanied by a Due Diligence Statement submitted by authorized operators or traders confirming conformity with the regulation.
