

Stora Enso Division Packaging Materials, Beihai Mill
Customer Information on Safety of Toys

For the purpose to achieve high chemical and microbiological purity only fresh fibers and food contact approved chemical additives are used as raw materials in the production of paperboard. The pulp and board manufacturing process conforms to established technology involving the use of generally recognized chemicals. The pulps used for board production are elemental chlorine free (ECF).

We hereby confirm that paperboards produced at Beihai mill comply with migration limits* for Category III specified in the European Standard EN 71-3:2019 Safety of toys – Part 3: Migration of certain elements.

** the new limit values on Aluminium that come into force May 20 2021 are respected even if the standard have not been amended.*

In addition, analysis on formaldehyde has been performed according to EN 1541 and the amount of formaldehyde is < 30 mg/kg.

This information is based upon analyses performed by competent third-party laboratory on representative sample of our product.

This information is valid for the products delivered by Stora Enso Division Packaging Materials, Beihai Mill before further packaging converting.
